TRIFLEX[®] version 3.2.1
Maintenance Release

Enhancements

PCF Export – In addition to the ability to import a PCF formatted data file into TRIFLEX, this release allows the program to export a PCF formatted file as well, establishing a two way communication with a variety of CAD and plant management programs.

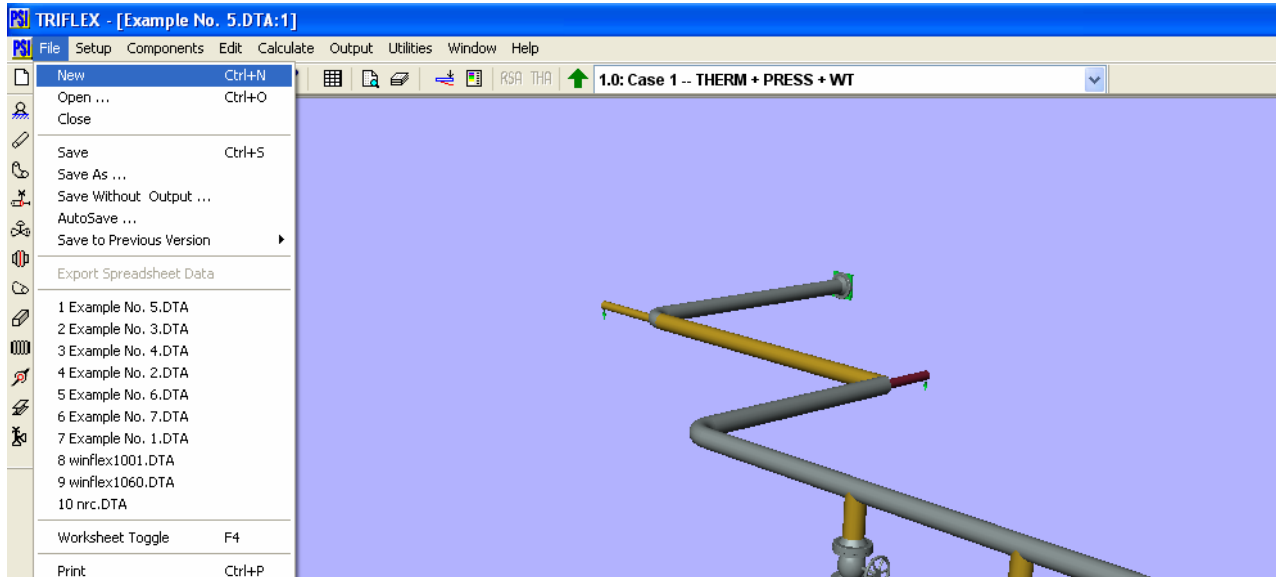

Export in one step: Go to Utilities, Export Files, and select PCF Files All Components (you can also select components for export before going to Utilities)
